A+ Computer Science - Input Worksheet 1

PART 1 DIRECTIONS : Fill in each blank below.

Word bank – java.util.Scanner | next() | nextInt() | nextDouble()
nextLine() | nextLong() | nextByte()

1. _java.util.Scanner_ is the import needed to use Scanner.

2. _nextInt()_ is the Scanner method used to input an integer.

3. _nextDouble()_ is the Scanner method used to input a double.

4. _next()_ is the Scanner method used to input a one word String.

5. _nextLine()_ is the Scanner method used to input a one line String.

PART 2 DIRECTIONS : Fill in the missing code in each blank.

```
Scanner keyboard = new Scanner(System.in);
int intOne=0;
double doubleOne=0;
short shortOne=0;
byte byteOne=0;

out.print("Enter an integer :: ");
intOne = _keyboard.nextInt()_ ;

out.print("Enter a double :: ");
doubleOne = _keyboard.nextDouble()_ ;

out.print("Enter a short :: ");
shortOne = _keyboard.nextShort()_ ;

out.print("Enter a byte :: ");
byteOne = _keyboard.nextByte()_ ;
```
